

Brief CV of Eldon R. Rene

Eldon R. Rene, holds a PhD in Chemical Engineering from IIT Madras (India). His research majorly focuses on topics related to the development of biological treatment processes for wastewater and waste-gas treatment, resource recovery, and the use of artificial intelligence tools for environmental monitoring and environmental process control. He is the Managing Editor of the journal "Reviews in Environmental Science and Bio/Technology" and the Associate Editor of the "Journal of Environmental Engineering (ASCE)".

Eldon R. Rene is the two time recipient of the "Young Scientist Award" conferred by the Challenges in Environmental Science and Engineering Conference (CESE) organizers in Sydney (Australia) and Kaohsiung (Taiwan), respectively. Previously, for his post-doctoral research stays, he was awarded the "Juan de la Cierva" fellowship by the Ministry of Science and Innovation (Spain), and the "Brain Korea 20 (BK20) Fellowship" from the South Korean government. For the years 2018 and 2019, he has recently been awarded Research Fund for International Young Scientists by the National Natural Science Foundation of China (NSFC). As a part of his educational campaign and capacity building activities on improving scientific writing skills for non-English speaking researchers, he regularly conducts scientific writing workshop at all the major conferences. Since 2016, he has taught ~650 MS, PhD students and young staff members during specialized events/workshops in China, Vietnam, Malaysia, Spain, Taiwan, The Netherlands and South Korea. He is also affiliated as a life member at the International Forum on Industrial Bioprocesses (IFIBiop).
