### **Short Bio:**

Prof. Rajendra Prasad Singh is working as a Professor at the School of Civil Engineering, Southeast University, Nanjing, China. Currently he is actively engaged in research related to bioremediation, water and wastewater treatment, sustainable urban water development, sustainable urban water system planning & design; low-impact development; ecological improvement for urban road and public space; real-time control of urban water supply and drainage systems; climate change; urban water environment and water ecosystem restoration; and rural ecological protection & restoration and environmental pollution related issues. He was the visiting fellow at School of Civil and Environmental Engineering, Purdue University in year 2013. Prof. Singh has published more than 75 research papers in leading SCI/JCR indexed international journals. He is a recipient of International Young Scientist Fellow Awards by NSFC China in 2015 and 2017. He is the member of various academic and non- governmental organization e.g. American Society of Civil Engineers (ASCE), Environmental & Water Resources Institute (EWRI), and International Water Association (IWA). Prof. Singh is also serving as Editorial Member in Water journal and the guest editor in leading SCI/JCR indexed international journals such as Bioresource Technology, International Bioremediation & Biodeterioration, International Journal of Water Resources Development, Water, Environmental Science & Pollution Research, and Applied Sciences. Prof. Singh was the chair of ICWRS-ICAFEE 2018 conference held in Nanjing, China.
